DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Maeda et al. (US 6,284,363).

Regarding claim 1, Maeda et al. discloses a radio wave absorbing thermally conductive sheet comprising: a soft sheet formed through mixing soft magnetic powder into silicon resin (abstract lines 1-3).

Regarding claim 2, wherein said soft magnetic powder is at least one of either ferritic soft magnetic powder or metallic soft magnetic powder (abstract lines 7-9).

Regarding claim 3, wherein said metallic soft magnetic powder comprises one or more among Permalloy, Sendust, silicon steel, Permendur, pure iron, and magnetic stainless steel, and said powder comprises spherical or flat-shaped particles (col. 3, lines 53-60).

Regarding claim 4, wherein a surface of said soft sheet is adhesive (abstract lines 12-15).

Regarding claim 5, wherein said soft sheet 2 is provided at both sides or one side of an electrically conductive sheet 3.

Art Unit: 2831

Regarding claim 6, said electrically conductive sheet 3 is of soft magnetic metal.

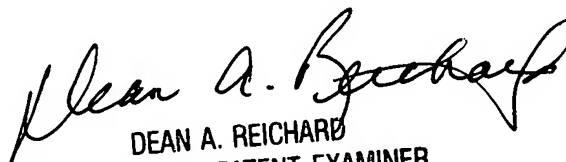

Regarding claim 7, wherein nonmagnetic inorganic powder (thermoconductive filler) is mixed into said soft sheet.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 4,003,840; US 6,716,904; and US 6,599,375 also show soft magnetic material in a silicon resin.
